

# shann

This leather has been manufactured from genuine cattle hides. During its life the animal may have come in contact with bushes, barbed wire or the horns of other animals. These episodes may have left scars and scratches that have healed naturally. These marks enhance its appearance as they are proof marks of genuine leather and they do not detract from its wearing qualities.

DO NOT DRY CLEAN

DO NOT MACHINE WASH

### Care Instructions:

Shann recommends the use of Colourlock Leather cleaning kit, available through our branches nationwide, visit [theshanngroup.com](http://theshanngroup.com) for branch locations. Do not use detergents, solvents, abrasives unrecommended leather cleaners or suede cleaners. Do not dry clean or machine wash. Protect from direct sunlight and heat sources, both direct and through heating vents. Vacuum regularly with the soft brush attachment of the vacuum cleaner to remove dust and grit, then wipe with a soft, colour fast cloth dampened with plain water. This should be done as often as necessary or at least every 2-3 weeks. Every 3 or 4 months, a systematic cleaning with the Colourlock cleaning kit is recommended. The Colourlock product has special additives to nourish your leather and add to its moisture repellence. When cleaning your leather do not rub excessively or too hard. Always let the Colourlock product do the work and adhere to the manufacturers instructions. Use only a soft, colour-fast white cloth or sponge as found in the Colourlock Kit.

### Special Note:

The salts and body oils which occur naturally in human skin can damage the surface of leather if left uncleaned for lengthy periods, even medical conditions and prescriptions can have adverse effects on the leather. In warm or humid climates, it is important that the leather be wiped over as often as weekly, particularly if the leather has become damp with perspiration or deposits of body oils are visible on areas such as head and arm rests. Always clean along any creases that have developed in the leather and pay particular attention to areas that come in contact with the skin such as head rests, arm pads or seat cushions. Shann stands by its reputation of distributing quality leathers with a **guarantee** to repair or replace any leather which is found to be faulty as a result of tannery defect and which has been used in accordance with the recommendations of SHANN LEATHER. Deterioration due to incorrect or inadequate maintenance cannot be considered a fault in the leather and claims due to this will not be entertained. The first point of contact for warranty claims is the retailer/manufacturer from where the product was purchased.
